

BRIGHTMAN MUTUMWAPAVI

Data Scientist | Machine Learning | Artificial Intelligence

+263 784151721 | mutumwapavibrightman@gmail.com | [MyLinkedIn](#) | github.com/BrightmanMT

PROFILE SUMMARY

Data Science graduate with practical experience developing machine learning, artificial intelligence, and analytics solutions to solve complex business problems. Skilled in Python, SQL, statistical modelling, Power BI, and database management, with experience building predictive models, fraud detection systems, customer analytics platforms, and AI-driven applications. Proven ability to transform large datasets into actionable insights through data science projects, internships, and hackathons. Passionate about leveraging AI, machine learning, and data-driven innovation to create measurable business impact

TECHNICAL SKILLS

Programming & Data Science: Python, SQL, Pandas, NumPy, Machine Learning, Statistical Analysis

Artificial Intelligence & Analytics: Predictive Modeling, Deep Learning, Data Analysis, Feature Engineering, Model Evaluation

Visualization & Tools: Power BI, Tableau, Excel, Git, Jupyter Notebook

Professional Skills: Analytical Thinking, Problem-Solving, Data Interpretation, Communication

WORK EXPERIENCE

AI Data Analyst Intern - EXCELERATE

Apr 2026 – May 2026

- Developed machine learning and statistical analytics solutions on student engagement datasets, achieving **96.3% predictive accuracy** and **99.2% ROC-AUC**, enabling data-driven identification of participation patterns and learner outcomes.
- Processed, validated, and analyzed large-scale educational datasets using Python, uncovering key engagement drivers and generating actionable insights to support
- Designed analytical reports, visualizations, and automated data workflows that transformed complex data into decision-ready insights, strengthening evidence-based planning and stakeholder reporting.

Machine Learning & Data Analytics Intern - ULEARN

Dec 2025 – Feb 2026

- Developed predictive analytics solutions using Python, SQL, XGBoost, BG/NBD, and Gamma-Gamma models to support customer intelligence, retention analysis, and business performance optimization.
- Built interactive Power BI dashboards and automated reporting pipelines, improving KPI visibility and reducing manual feedback analysis time by **60%** through streamlined reporting processes.
- Performed data extraction, transformation, validation, and exploratory analysis on large customer datasets, delivering accurate insights that supported strategic decision-making and customer-focused initiatives.

PROJECTS

DMTech AI Customer Assistant

Python, Flask, OpenAI API

- Designed and deployed an AI-powered customer engagement platform using Python, Flask, OpenAI APIs, HTML, CSS, and JavaScript, enabling 24/7 automated support, intelligent query handling, and real-time lead qualification for business websites.
- Developed a company-specific conversational AI system with contextual knowledge retrieval, voice interaction capabilities, and session-aware dialogue management, improving customer experience, accelerating response times, and supporting digital transformation initiatives

Customer Lifetime Value (CLV) & Customer Analytics System

XGBoost, BG/NBD, Gamma-Gamma

- Designed and implemented an end-to-end customer analytics platform using Python, SQL, and machine learning techniques to analyze 779,425+ retail transactions from 5,878 customers across 41 countries.
- Performed large-scale data preparation, feature engineering, and predictive modeling using XGBoost, BG/NBD, and Gamma-Gamma models to support customer segmentation and revenue forecasting.
- Developed analytical dashboards and customer intelligence solutions that identified high-value customer groups, improved retention visibility, and enabled data-driven business decision-making.

Maternal Health Hybrid AI Agent

Python, LangChain, OpenAI, FAISS, Streamlit, RAG

- Designed and developed a hybrid AI decision-support platform using Python, LangChain, OpenAI, FAISS, and Streamlit, integrating WHO maternal-health guidelines with machine learning-based risk assessment for healthcare recommendations.
- Built a Retrieval-Augmented Generation (RAG) pipeline that processed and indexed 1,000+ maternal health guidance documents and clinical references, enabling context-aware question answering with source-cited responses and trusted medical knowledge retrieval.
- Developed an AI-powered risk prediction engine that analyzed six maternal health indicators to classify pregnancy risk levels, automatically generating personalized guidance and explainable recommendations to support informed healthcare decision-making.

CERTIFICATIONS

Google Data Analytics Professional Certificate | WorldQuant University **Applied Data Science Lab** | DataCamp Associate **Data Scientist Track**

ACHIEVEMENTS

- **Top 25%** – IndabaX Zimbabwe 2026 Hackathon (Loan Default Prediction)
- **3rd Place** – VISMAYAH 2K25 EDA Competition
- **Zimbabwe Presidential Scholarship Recipient**

EDUCATION

- **Adikavi Nannaya University** (*Andhra Pradesh India*) - B.Sc. Data Science | CGPA: 9.13/10
-
